Web of Life Activity

The book *Because of an Acorn* by Lola M. Schaefer and Adam Schaefer tells the story of how an *ecosystem* works. An *ecosystem* is made up of many plants, animals, and landforms such as river and lakes. All of these things work together to form a community. Based on the book, see if you can connect the food web below! Hint when you’re finished, it should look a little like a spider web.
